Safety data sheet

according to (EU) 2015 / 830

Revision: April 1, 2024

SECTION 1: Identification of the substance/mixture and of the company/ undertaking

· 1.1 Product identifier

Trade name: Super Lube® Silicone Aerosol

• **1.2 Relevant identified uses of the substance or mixture and uses advised against** No further relevant information available.

· Application of the substance / the mixture Lubricant

 1.3 Details of the supplier of the Safety Data Sheet
 Manufacturer/Supplier: Kano Laboratories LLC
 24 DaVinci Dr., P.O. Box 405
 Bohemia, NY 11716
 Telephone: 631-567-5300
 Email: info@super-lube.com

 Information concerning particular hazards for human and environment: The product has to be labelled due to the calculation procedure of the "General Classification guideline for preparations of the EU" in the latest valid version. Warning! Pressurised container. 			
 Classification system: The classification is according to the latest editions of the EU-lists, and extended by company and literature data. The classification is in accordance with the latest editions of international substances lists, and is supplemented by information from technical literature and by information provided by the company. 			
· Additional information: 0 percent of the mixture consists of component(s) of unknown toxicity			
· 2.2 Label elements			
 Labelling according to Regulation (EC) No 1272/2008 The product is classified and labelled according to the CLP regulation. 			
· Hazard pictograms

SECTION 4: First aid measures

· 4.1 Description of first aid measures

• General information:

Take affected persons out into the fresh air.

Immediately remove any clothing soiled by the product.

· After inhalation:

Supply fresh air; consult doctor in case of complaints.

Provide oxygen treatment if affected person has difficulty breathing.

SECTION	Firefighting measures
SECTION 5	Firenginning measures

Carbon dioxide

Fire-extinguishing powder

Gaseous extinguishing agents

· For safety reasons unsuitable extinguishing agents: Water

5.2 Special hazards arising from the substance or mixture

Formation of toxic gases is possible during heating or in case of fire.

Danger of receptacles bursting because of high vapour pressure when heated.

5.3 Advice for firefighters

· Protective equipment:

Wear self-contained respiratory protective device.

Wear fully protective suit.

(Contd. on page 5)

Revision: April 1, 2024

Trade name: Super Lube® Silicone Aerosol (Contd. of page 4) Additional information Eliminate all ignition sources if safe to do so. Cool endangered receptacles with water fog or haze. Leaking gas fire: Do not extinguish, unless leak can be stopped safely. **SECTION 6: Accidental release measures** 6.1 Personal precautions, protective equipment and emergency procedures Use respiratory protective device against the effects of fumes/dust/aerosol. Ensure adequate ventilation Wear protective equipment. Keep unprotected persons away. Keep away from ignition sources. Protect from heat. · 6.2 Environmental precautions: Do not allow to enter sewers/ surface or ground water. Inform respective authorities in case of seepage into water course or sewage system. 6.3 Methods and material for containment and cleaning up: Allow to evaporate. Absorb with non-combustible liquid-binding material (sand, diatomite, acid binders, universal binders). Dispose contaminated material as waste according to item 13. Send for recovery or disposal in suitable receptacles. 6.4 Reference to other sections See Section 7 for information on safe handling. See Section 8 for information on personal protection equipment. See Section 13 for disposal information. SECTION 7: Handling and storage 7.1 Precautions for safe handling Use only in well ventilated areas. Keep away from heat and direct sunlight. · Information about fire - and explosion protection: Do not spray onto a naked flame or any incandescent material. Keep ignition sources away - Do not smoke. Pressurised container: protect from sunlight and do not expose to temperatures exceeding 50 °C, i.e. electric lights. Do not pierce or burn, even after use. Emergency cooling must be available in case of nearby fire. Keep respiratory protective device available. 7.2 Conditions for safe storage, including any incompatibilities · Storage: · Requirements to be met by storerooms and receptacles: Store in a cool location. Provide ventilation for receptacles.

Observe official regulations on storing packagings with pressurised containers.

Avoid storage near extreme heat, ignition sources or open flame.

· Information about storage in one common storage facility:

(Contd. on page 6)

Revision: April 1, 2024

Trade name: Super Lube® Silicone Aerosol

(Contd. of page 5)

Store away from oxidising agents. Further information about storage conditions: Store in a cool place. Heat will increase pressure and may lead to the receptacle bursting. Keep container tightly sealed. Protect from heat and direct sunlight. Storage Temperatures : <122 ° F / <50 °C. · 7.3 Specific end use(s) No further relevant information available.

SECTION 8: Exposure controls/personal protection

· Additional information about design of technical facilities: No further data; see item 7.

Wash hands before breaks and at the end of work. Do not inhale gases / fumes / aerosols.

Avoid contact with the eyes and skin.

Respiratory protection:

Wear appropriate NIOSH respirator when ventilation is inadequate and occupational exposure limits are exceeded.

Use suitable respiratory protective device in case of insufficient ventilation.

Protection of hands:

Protective gloves

The glove material has to be impermeable and resistant to the product/ the substance/ the preparation. Selection of the glove material on consideration of the penetration times, rates of diffusion and the degradation.

Material of gloves

The selection of the suitable gloves does not only depend on the material, but also on further marks of quality and varies from manufacturer to manufacturer. As the product is a preparation of several substances, the resistance of the glove material can not be calculated in advance and has therefore to be checked prior to the application.

· Penetration time of glove material

The exact break through time has to be found out by the manufacturer of the protective gloves and has to be observed.

Eye protection:

Safety glasses

· Body protection:

Not required under normal conditions of use.

Protection may be required for spills.

· Limitation and supervision of exposure into the environment Avoid release to the environment.

· Risk management measures

See Section 7 for additional information. No further relevant information available.

· 10.1 Reactivity
· 10.2 Chemical stability
 Thermal decomposition / conditions to be avoided:
Keep away from heat/sparks/open flames/hot surfaces No smoking.
10.3 Possibility of hazardous reactions
Extremely flammable aerosol.
Develops readily flammable gases/fumes.
Danger of receptacles bursting because of high vapour pressure when heated. Reacts with peroxides and other radical forming substances.

Can form explosive mixtures in air if heated above flash point and/or when sprayed or atomised. • **10.4 Conditions to avoid**

Keep ignition sources away - Do not smoke. Store away from oxidising agents.

SECTION 11: Toxicological information

· 11.1 Information on toxicological effects

Acute toxicity:

· LD/LC50 values relevant for classification:

142-82-5 heptane

Oral LD50 > 5000 mg/kg (rat) (Estimate)

Inhalative LC50/4h 103 mg/l (rat)

• Primary irritant effect:

· on the skin: Irritant to skin and mucous membranes.

on the eye: Irritating effect.

• Sensitisation: No sensitising effects known.

• Subacute to chronic toxicity: No further relevant information available.

Additional toxicological information:

Irritant

Inhalation of concentrated vapours as well as oral intake will lead to anaesthesia-like conditions and headache, dizziness, etc.

The product shows the following dangers according to the calculation method of the General EU Classification Guidelines for Preparations as issued in the latest version:

• Acute effects (acute toxicity, irritation and corrosivity):

Vapours have narcotic effect.

Irritating to eyes.

Irritating to skin.

• Repeated dose toxicity: No further relevant information available.

SECTION 12: Ecological information

· 12.1 Toxicity

· Aquatic toxicity: Toxic for aquatic organisms

- · 12.2 Persistence and degradability No further relevant information available.
- 12.3 Bioaccumulative potential Does not accumulate in organisms.
- 12.4 Mobility in soil No further relevant information available.

This statement was deduced from the properties of the single components.

Water hazard class 2 (German Regulation) (Self-assessment): hazardous for water

Do not allow product to reach ground water, water course or sewage system.

Danger to drinking water if even small quantities leak into the ground.

Due to available data on eliminability/decomposition and bioaccumulation potential prolonged term damage of the environment can not be excluded.

SECTION 13: Disposal considerations

· 13.1 Waste treatment methods

· Recommendation

Contact waste processors for recycling information.

The user of this material has the responsibility to dispose of unused material, residues and containers in compliance with all relevant local, state and federal laws and regulations regarding treatment, storage and disposal for hazardous and nonhazardous wastes. Residual materials should be treated as hazardous.

· Uncleaned packaging:
